

System Design Questions

How should undergraduate and graduate degree programs be developed?

- How many and what types do we need?
- Where should they be developed?

What are rational rules for growth?

- Where are students now being served?
- What 'critical mass' of unmet need justifies building a new campus, expanding an existing campus, or creating a new higher education center?

Timeline

March 2009

Convene study group
Refine plan scope, schedule
Specify planning tasks

March-October 2009

Undertake planning, meetings

October 2009

Report preliminary findings

November 2009

Adopt recommendations
